Energy-Efficient Eco Buildings

Comfortable space throughout the seasons. Our entire range of buildings are highly insulated and designed to be energy efficient.

Made With SIPs

All of our kits are made from Structural Insulated Panels which we manufacture by injecting highly insulated Polyurethane between two sheets of structural OSB3. The panels form the floor, walls and roof creating an incredibly rigid, highly insulated passive standard structure.

We factory fabricate the panels into components that act like giant Lego blocks allowing you to assemble the core structure quickly and efficiently.

Garden Room Range

Space : 1
